

Lot 3 Supply of specialised vehicles for the Sector for Control and Investigations/Law Enforcement Department of the Customs Administration

Duration: 12.01.2026 - 12.11.2026

Countries:
North Macedonia

EU contribution: € 584 720

Total budget: € 584 720

Implementer:
Euroimpeks DOO Skopje

Project description:

This action supports the Customs Administration's operational capacity strengthening by equipping its Sector for Control and Investigations (Law Enforcement Department) with specialised vehicles. The intervention is designed to improve the effectiveness of customs mobile teams and K9 units in preventing and combating cross-border crime, illicit trade, and corruption.

By providing modern and purpose-built vehicles, the project enhances the mobility, responsiveness, and field presence of customs officers across the entire territory of the country. This contributes to more efficient inspections, improved enforcement operations, and stronger border security, in line with EU standards and best practices in customs control and law enforcement.

Expected results:

- Improved operational capacity of the Customs Administration through the provision of specialised vehicles.
- Increased mobility and efficiency of customs mobile teams and inspectors in conducting field operations.
- Strengthened capacity of K9 units through dedicated transport and operational support.
- Enhanced ability to detect and prevent cross-border crime and illicit trade.
- Provision of one dedicated vehicle for the safe transportation of temporarily detained individuals, supporting enforcement procedures.
